

RIG'N ROLL

Cable Pulling Tool for Cable Bridge

Simplifies cable pulling work on cable ladders and trays. Patented solution. The tool steers cables that roll easily on straight stretches, corners, ups and downs. Available in two sizes. Size 1 for cable up to 60 mm diameter. Size 2 for cable up to 100 mm diameters.

All metal parts are made of 316 stainless steel. Plastic wheels and castors are made of oilon.

Rig'n Roll is also available for trays. (Photo 2 and 3).

Will be delivered with adjustable Al-pads for fixing on cable ladder side bar (Photo 4).
