

SEALING MASTIC

Grey mastic

Grey mastic is used to seal the cable lugs when you use end terminations of silicone rubber (push on).

Will be delivered in meters.

El. no. 18 191 50

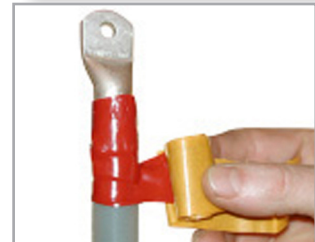

Red mastic

Red mastic is used to seal the cable lugs and the outer jacket, if you use end terminations of shrink plastic.

Supplied as strips of 30 cm, price per meter.

El. no. 18 190 99

Yellow mastic

Yellow mastic used as field mastic on semiconductor offtake and over splice ferrules.

El. no. 18 191 51

Black mastic

Black mastic used to seal outer ferrules / outer sheath of cable joints.

Will be delivered in meters.

El. no. 18 191 39

Green mastic

Green mastic is used to seal the outersheath take-off when using terminations and joints of silicone rubber.

Supplied in rolls of 500 mm length.

El. no. 18 191 01

Orange mastic - OM

OM is a soft and tacky orange colored rubber based stress grading (Hi K) mastic, with excellent electrical performance. Designed for both joints and terminations for screen cut area as well as ferrule area, functioning as a void filler up to 42kV. Available as plates or strips.

Art. no. 99 100 05
