

ITK off.

12/24 kV termination for 1-core offshore cable

Termination for indoor use 1-core RFOU / BFOU cable
12/24 kV.

ITK 224/324 is an end termination of the type cold shrink which is produced with flexible silicon rubber that is pre-fabricated with all components built.

The product has been tested and approved by
Cenelec HD 629.S1.

Each set contains 3 complete one-wire terminations with
Norwegian assembly instructions.

Cable lugs must be ordered separately according to the
pressure system to be used.

- No heat tools
- Quick and easy installation
- Greater flexibility in cross section
- Consistent quality of assembly
