

PETROLINK 0,6-1 kV

Cable joint for cable type
TFLP 0,6-1 kV

Cable joints custom made for process plants. The cables that are typically referred to as TFLP have a middle jacket of polyamide laminated Al foil.

Petrolink joints are constructed the same way as the cables and tested after the same requirements. The joints has a special protection against the ingress of moisture and harmful oil products.

Test report provided on request.
