

ELITE

Plastic cleats for attaching cables and pipes to wall and cabletrays

Elite is a powerful plastic cleat for attaching cables and pipes to the wall and cable trays. The cleat is very easy to install and can also be opened again if this is necessary (see figure 1,2,3 and 4). The four sizes cover cables from 9.5 mm to 52 mm. Elite has internal grooves that prevent the attached cable from sliding when it is fixed vertically.

The product comes in flame-retardant halogen free LSF-plastic.

Used to fix cables for indoor and outdoor applications.
