

# FLEXISTRAP - FS

## Cable straps in stainless steel without fixing bolts

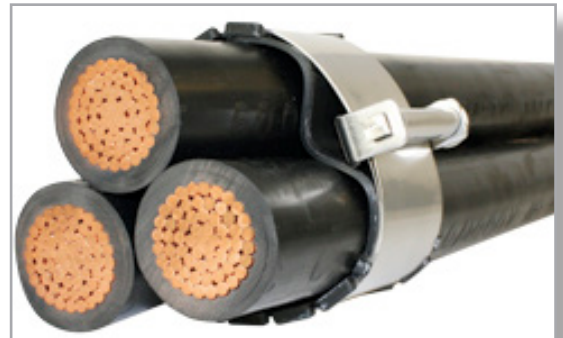

Short circuit-proof straps that are intended for trefoil cable extension in combination with Vulcan or Emperor cable clamps.

Flexi strap has the designation SD in combination with Vulcan (wrapped 2x around the cable) and HD in combination with the Emperor (wrapped 3x around the cables). The clamp is supplied as standard with an internal plastic lining.

Special key for fixing together clamps can be ordered separately.

All types of clamps are 50mm wide.

Can also be used to bundle together large parcels with less cables.

**Qualifications:** Short circuit tested in accordance with IEC 61914 2009.

**Materials:** Stainless steel 316L.

The plastic bushing consists of Fume Zero Halogen Polymeric liner and it prevents sharp edges to cut into the cable construction.
