

WRS - HF

0-Halogen wrap-around sleeve with adhesive

Heat-shrink wrap-around sleeve with adhesive, reinforced with polyethylene fibers. Flexible locking channel in stainless steel. Used for general sealing and protection, repairs of damaged cable or replacement of the outer jacket. Easy installation.

Abilities:

- High mechanical strength
- Very good moisture barrier
- Shrink Ratio 5:1
- 0-Halogen
- Shrink Temperature: 120°C
- Good resistance to chemicals
- Max. continuously operating temperature: 95°C
- Can be cut to the desired length before installation
