

MONO i

Termination for single and 3-core medium voltage cable (indoor)

Termination for single and 3-core medium voltage cable, type 24 kV MONOi, TSLP-cable.

Termination MONOi, consist of one heatshrink-tube containing both field distributor and insulation, in one operation.

MONOi-series is based on heatshrink-plastic used for protection against creepage and field distribution. Mastic ensure good sealing both on lugs and outer jacket. An additional set ensures grounding aluminium-laminate and connect it together with the Cu-screen.

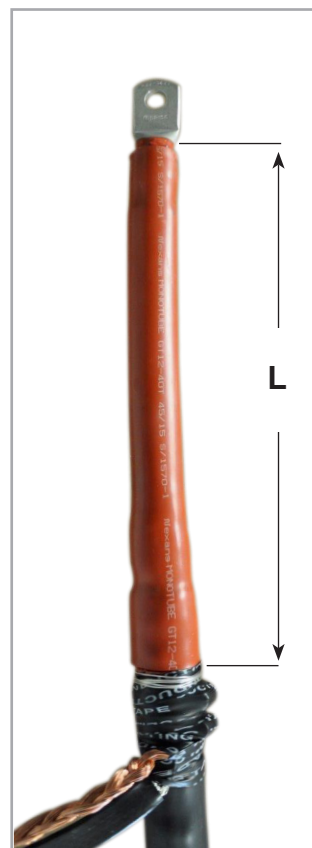

The product is tested and approved for use up to 24kV after norm Cenelec HD 629.152 og IEC 60502-4.

Each kit contains 3 complete single core leder terminations with installation instructions.

Lugs must be ordered separately according to used crimp-system.

For further information, see installation instruction MB 1033 (english version).

- Easy installation
- Good cross-section flexibility
- Length: 320*/340/370 mm

Single core
