## CABLE LUGS

## H.V, Cu, up to 36 kV

Series CA-M and 2A-M are designed for high voltage applications up to 33 kV . They are manufactured from electrolytic copper tube Cu-OF CW008A conform to UNI EN 13600, annealed and tin plated.
The extended barrel enhances both electrical and mechanical performance. The absence of an inspection hole prevents moisture entry into the crimped joint and makes these terminals suitable for outdoor applications.

CA-M and 2AM series terminals with double stud hole palm are also available.Table for dies on page 230, Dies for High Voltage.

See table for dies on page 230, Material and dies for H.V, Cu-conductors.
