

INSULATED HYDRAULIC CUTTING UNITS

CP 1096-W-1000kV / CP 1120-W-1000kV

These insulated cable cutting units can be used to safely cut copper and aluminium cables with nominal voltage up to 60 kV, where the absence of voltage cannot be guaranteed. The insulated hose is 10 meter.

These units can be use both indoors and out, even in wet conditions when the temperature is between -20°C and +40°C.

Do not cut cables with special armour.
