

HYDRAULIC TOOL FOR TEMPORAIL

Temporary rail electrical connection system TEMPORAIL for return current, signalling and earthing applications.

- Specifically designed to insert and extract Cembre Temporail clamp
- Works on all rail types with foot up to 5.9 inc.
- Patented tool with safety feature protects against ejection of metal pieces during extraction

Temporail requires no preliminary preparation to ensure good electrical connection as the clamp deeply scores the surface of the rail foot during installation.

Simple, safe insertion and extraction of Cembre Temporail
